

The powerful power units of the 650 series supply all your devices from the LUKAS rerailing system with the necessary power for your project. The use of two- or also four-flow radial piston pumps is possible. Depending on your needs, up to four hydraulic cylinders can be supplied with the same flow rates. Maneuver synchronous extension and retraction of identical lift cylinders via the control desk.

## Technical Data

Dimensions: **533 x 456 x 612 mm**

Flow Capacity, High Pressure:	<b>2 x 0.7 l/min</b>
-------------------------------	----------------------

Flow Capacity, Low Pressure:	<b>2 x 2.6 l/min</b>
------------------------------	----------------------

Weight:	<b>76 kg</b>
---------	--------------

Motor:	<b>230 V / 50 Hz</b>
--------	----------------------

Motor Output:	<b>2.2 kW</b>
---------------	---------------

Usable Oil Quantity:	<b>23 l</b>
----------------------	-------------
