

LIFTING CYLINDERS - COMPACT POWER GENERATORS FOR SHORT DISTANCES

Thanks to their telescopic design, they can handle long lifting distances with a low overall height and can be used flexibly. They are made of a high-strength light alloy, corrosion-resistant, easy to maintain and particularly light.

PERFECTLY MATCHED

The stroke paths and lifting forces of the various cylinders are matched to each other in every detail.

TRANSPORT

Crane eyes on the handles of the cylinders facilitate transport.

Technical Data

Height:	234 mm
Total Stroke:	185 mm
Piston Stroke 1:	89 mm
Piston Stroke 2:	96 mm
Piston Lifting Force 1:	1066 kN
Piston Lifting Force 2:	504 kN
Weight:	25.2 kg
Oil Volume:	2.0 l
