

## Pulling Device

### Separating wedged vehicles.

The powerful pulling device is used whenever vehicles are wedged together due to an accident.

This simple but powerful product can also be used as a fast and safe way to unblock the way when a train is jammed between the walls of a tunnel or bridge or when an obstacle blocks the track.

#### Huge Benefit:

The device can be fastened to the rails or a ground anchor, independent from the track width.

The pulling device consists of a 9.5 m pulling rope and a pulling jack with holding ropes and rail attachments.

**Please specify the relevant rail profile for your project.!**

### Technical Data

Weight: **194 kg**

Pulling Force: **220 kN**

Oil Volume: **1 l**
