

Compact-traversing unit

For light rail vehicles.

On a suitable surface, light rail vehicles can be traversed using the compact traversing unit, which allows you to rerail with absolute precision.

This is thought through in detail to ensure that your rescue mission runs smoothly and safely. Use one or two units, depending on the weight of the accident vehicle.

Permissible loads

Single-point lifting: 200 kN (20 t)
i.e. rail vehicles weighing up to 400 kN (40 t)

Two-point lifting 2 x 150 kN (15 t)
i.e. rail vehicles weighing up to 600 kN (60 t)

Technical Data

Width: **375 mm**

Height: **153 mm**

Length: **865 mm**

Weight: **73 kg**

Traverse Movement to: **300 mm**
