

LX GLASS

As part of the redesign of our LUKAS rescue accessories, we have completely revised our glass management set. In the redesign of the **LX GLASS**, the focus was on the high quality and thus user-friendly applicability of the products contained. By the way, from now on our new LUKAS accessory series will be called **LUKAS LX** plus the short name of the respective product. Thereby "LX" stands for **LUKAS EXTRA**. The revised equipment now has a fresher look, is neat and of high quality, has a clear design language and uniform naming.
