

MORE POWER, LESS WEIGHT. THE NEW STANDARD IN THE COMPACT CLASS

It has the highest spreading force in its class and has gained 20% more force compared to its predecessor model. The SP 333 has been made 23% lighter than its predecessor, the SP 300, and even more attractive in design. Further advantages: the crushing plates firmly integrated into the arms and biting "Shark Tooth" tips, which are characterised by irresistible grip. With this convincing package of benefits, the new machine is recommended for all hazardous situations where high performance and minimum weight are required for spreading, crushing and pulling. The SP 333 sets the new standard in the compact class with such superiority.

"Shark Tooth" Tips

The necessary grip when spreading when every second counts: The specially developed "Shark Tooth" tips offer maximum bite thanks to their design and the 3-row arrangement of the teeth!

Technical Data

Dimensions:	723 x 285 x 202 mm
EN-Classification:	AS-42/600 - 13,4
Weight:	13,4 kg
Squeezing force up to:	144 kN
Series:	Tubular
Spreading force:	42 - 836 kN
Spreading distance:	600 mm
Pulling force up to:	56 kN
Pulling distance:	440 mm
Oil requirement:	150 cm ³
