

MAKES RESCUE EQUIPMENT MOBILE

The P 600 OE makes tube-bound rescue equipment mobile. It gives you maximum freedom of movement during every operation, because it is small, light and handy on the one hand, and on the other hand it allows you to use a rescue system from any location with the optional battery operation. You have the choice: operate your rescue system with the mains connection or with a high-performance battery. The device has a unique energy management system that guarantees you enormously long battery life. The P 600 OE is very patient-friendly, as it produces no exhaust fumes and is extremely quiet. The particularly mobile unit is small, light (under 10 kg) and easy to operate. There are no limits to the range of action! The monocoupling makes connecting and using the rescue equipment easier, faster and safer.

Technical Data

Dimensions: **460 x 182 x 257 mm**

Delivery rate low-high pressure: **2,4 - 0,45 l/min**

filling capacity: **1,5 l**

Weight: **8,3 kg**

Oil volume: **1,2 l**
