

#### PULLING DEVICE FOR LUKAS SPREADERS AND COMBI TOOLS

The LUKAS pulling devices are specially designed for use in combination with LUKAS spreaders and combination tools. Our tools may only be operated in conjunction with the respective approved pulling devices and may only be used for pulling, e.g. for pulling away obstacles or for enlarging the area. Our tools may only be operated in conjunction with the respective approved pulling devices and may only be used for pulling, e.g. pulling away obstacles or for enlarging openings in order to free trapped persons.

#### Proof of use KSV 11:

- SP 333, SP 333 E2, SP 333 eWXT
- SP 555, SP 555 E2, SP 555 eWXT
- SP 777, SP 777 E2, SP 777 eWXT
- SC 358, SC 358 E2, SC 358 eWXT (use in combination with traction attachment (81-67-21))

#### Technical Data

Length:	2 x 2 m
Weight:	13,3 kg
Target diameter (mm) / target length chain link (mm):	10/30
Permissible load:	62 kN
