

GREATER FORCE FOR THE NEW KNIFE GEOMETRY

The new S 789 eWXT offers less weight with identical power values to the E2 predecessor series and a shorter design that significantly improves the balance of the machine. However, the new blade technology based on our THE BEAST by LUKAS S 799 E2 is particularly outstanding. Its "curved sickle knives" have now also been fitted to the S 789 eWXT. Due to the wide knife opening, which hardly decreases towards the central bolt, in combination with a high jaw depth, it is possible to completely enclose the material to be cut and cut through with one cut. The S 789 eWXT is also a liquid-protected rescue system. Operations in heavy rain, high water or even under water are no problem, because it is waterproof. Matching the series are the 5 Ah or 9 Ah rescue batteries with the longest operating time in the industry.

Technical Data

Dimensions:	912 x 266 x 253 mm
EN-Classification:	CC 205 K - 23,6
EN cutting class:	K
EN Cutting capacity:	1K-2K-3K-4K-5K
Weight:	22,4 kg
Blade opening:	205 mm
NFPA cutting classes:	A8, B9, C8, D9, E9, F5
Round steel up to:	42 mm
Cutting force up to:	1100 kN
Protection class:	IP 58
Series:	eWXT
