

### THE GOLDEN MEAN AND THE LUKAS STANDARD

The LUKAS rescue rams not only impress with a convincing lifting power, a particularly firm grip thanks to the "claw geometry" and a particularly long stroke, they can also be used flexibly. For example, our telescopic rescue cylinders are available in three different lengths, which can be used as required. The R 521 eWXT is the "golden mean" of our telescopic rescue cylinders. It forms the basis and the standard gauge for our muscle man R 522 eWXT and the Minimiser R 520 eWXT. Its claw technology bites into any material and in any position. The small giant is waterproof like the whole eWXT range and is optionally equipped with a 5 Ah or 9 Ah rescue battery. The 9 Ah battery offers the longest operating time in the industry.

### Technical Data

Dimensions:	<b>579 x 140 x 327 mm</b>
Extended length:	<b>1359 mm</b>
EN-Classification:	<b>R 127/403-60/377-20,2</b>
Total lift:	<b>780 mm</b>
Lifting force piston 1:	<b>127 kN</b>
Lifting force piston 2:	<b>60 kN</b>
piston stroke piston 1:	<b>403 mm</b>
piston stroke piston 2:	<b>377 mm</b>
Weight:	<b>19,0 kg</b>
Protection class:	<b>IP 58</b>
Series:	<b>eWXT</b>
Type:	<b>Telescopic cylinder</b>
