

## E2 RESCUE BATTERY

Thanks to special high-performance rechargeable batteries from LUKAS, all devices deliver advanced eDRAULIC power for a 1-hour rescue operation. Enough to rescue people from a vehicle and then take further action. Because we know what emergency services need, the devices are equipped with a special battery technology adapted to rescue operations. tests show: only batteries that are designed for peak discharge during an operation deliver the performance you need in all situations.

### Technical Data

Operating temperature: **-20°C bis +55°C**

Energy: **5,0 Ah 126 Wh**

Charging Time: **150 min**

Weight: **0,9 kg**

Nominal Voltage: **25,2 VDC**
