

9 AH SALZWASSER

LUKAS HIGH PERFORMANCE BATTERY SPECIALLY DEVELOPED FOR RESCUE OPERATIONS.

LUKAS rechargeable batteries are specially developed for use in hydraulic rescue tools and are designed to provide peak power whenever they need to deliver the required performance. LUKAS rescue tools are supplied with a constant energy current by our accumulators, which not only ensures the constant performance of the tool, but also prolongs the life of the battery. A reliable partner when every second counts. Choose for yourself which performance is needed or which requirements the rescue tool has to meet, because in addition to our proven 5 Ah rescue batteries we now also have the 9 Ah battery in our portfolio and the 9 Ah rescue battery saltwater, with the world's most powerful performance in the industry.

Technical Data

| | |
|-------------------|------------------|
| Dimensions: | 176 x 97 x 89 mm |
| Energy: | 227 W |
| Capacity: | 9,0 Ah |
| Charging Time: | 2,5 Std. |
| Weight: | 1,6 kg |
| Nominal Voltage: | 25,2 VDC |
| Protection class: | IP 68 |
